REMARKS

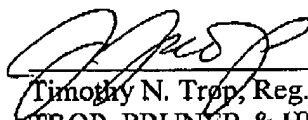

Reconsideration is requested with respect to the rejection of claim 14. It calls for the radiation patterns of the first antenna to be different from the radiation pattern of the second antenna.

Referring to Figures 3A and 3B of Ishizaki, it is clear that the radiation patterns in the vertical direction are identical between the two antennas and the radiation pattern in the horizontal direction is identical between the two patterns. Therefore, no difference in the radiation patterns overall is discernable between the two antennas.

Therefore, reconsideration of the rejection of claim 14 and its dependent claims is respectfully requested.

Respectfully submitted,

Date:

Oct 2, 2008
